

SAP PRACTICE OVERVIEW

Built upon customer success

As a system integrator and ERP consulting services provider, RJT Compuquest serves customers throughout the western United States with innovative and successful business solutions. Founded in 1996, RJT continually evolves and develops new offerings to provide companies the tools and services they need to cope with today's ever changing business environment. With over a decade of experience, RJT has been helping organizations improve business processes and streamline operations through our reliable services and proven solutions.

Experience

At RJT, our focus is on the quality of our people. Our teams are given the support needed to stay current on the latest business technologies to advise our clients on the most updated solutions. Through the expertise of our customer engagement managers, we work with our customers to understand, assess and plan their needs in order to deploy the right resources for the project. Our consultants have an average of 10 years of business experience and 5 years of SAP experience. By engaging RJT's management team and seasoned consultants, our customers achieve that highly desirable mix of superb workmanship necessary for a higher ROI and lower total cost.

Services and Solutions

RJT is a recognized leader in providing SAP services and solutions. As a certified SAP channel and services partner, RJT leverages its highly experienced project management and consulting teams to produce the best possible solutions.

When a company chooses RJT as its SAP services and solutions provider, they are investing in an organization built upon customer focused success. RJT's experienced and multi-skilled team works as an extension of our customers to solve issues and complete projects on time. Through good team work and communication, we believe we can meet and exceed client expectations.

Every day RJT strives to ensure the success of its SAP projects in the following core areas:

- » Qualified industry solutions for small and midsize companies
- » SAP BusinessObjects
- » Business intelligence
- » Rapid CRM implementation
- » SAP certified database migration
- » Remote SAP Basis support
- » Functional support
- » Offshore development
