

BUSINESS INTELLIGENCE STARTER PACK

Properly implemented business intelligence (BI) strategy gives you the tools to increase profitability, improve relationships with your customers, and increase operational efficiency. RJT Compuquest has partnered with The BI Builders to offer a fast, affordable way to implement BI for your business. By building an SAP BusinessObjects BI solution on top of your SAP data, The BI Builders will enable you to make critical decisions and take action to improve your business.

- ✓ Do you need to reduce time and resources spent on spreadsheets and ABAP reports?
- ✓ Need to find out critical factors to success before they become a problem?

Start here, with the Business Intelligence Starter Pack for SAP users

The Implementation Services

Two weeks of implementation and consulting services with a team of The BI Builders business intelligence specialists.

- Interviews with business and IT stakeholders to evaluate your existing environment and develop a strategy and implementation plan
- Installation and configuration of the software solution
- Mentor and train your organization on deployment and administration best practices

Features of SAP BusinessObjects Edge BI Software

- Reporting and querying
- Live data access in Microsoft Office applications
- Personal dashboard viewing
- Security, scheduling, and management (including your existing Crystal Reports)

*Price and features stated applies only to base version. Ask about our professional package, which includes Data Integrator for delivering SAP and non-SAP data together.
